

Code Task: Submit the .cpp files to solve the task below, make sure to reference all the sources you used to solve the problem.

Read the following sets of notes on Arrays and Functions here:

<https://www.usna.edu/Users/cs/choi/ic210/lec/l19/lec.html>

<https://www.usna.edu/Users/cs/choi/ic210/lec/l20/lec.html>

Then write a function with the following declaration

```
int* getarray(int N, int x);
```

that allocates and returns a pointer to an array of N ints, each initialized to the value x.
